

Basic information

DAA MONTENEGRO

Vision

As the media evolve and markets become tougher playgrounds to do business, the demands of clients and us in the agency are constantly increasing. Since 2006, DAA Montenegro has been successfully developing modern solutions for all types of media.

Our mission is to provide our clients a way to make a positive and vibrant impression in highly competitive markets, which will allow them to stand out and reach their goals more easily.

We guide ourselves with 4 principles to keep reminding us that, with every client of ours, there is a possibility to find a new creative potential for breaking the limits of visual art and even setting up new standards:

IDEA as begining

original | simple | funny

LOVE as inspiration

honest | pure | memorable

PROGRESS as philosophy

hard | continous | productive

EXCITEMENT as fuel

big | surprising | advancing

Having these principles in mind allows us to give our best and use the potential our clients have to the maximum level. We believe that a good relationship and everyday cooperation with our clients is of crucial importance, because quality solution can only be created with joint forces and synergy of ideas.

Approach

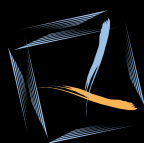

Our visions cannot be realized without the unique team of diverse, remarkable individuals, who are excellent team players, craving for perfect solutions and new challenges, making our work an exciting adventure! As a guarantee of quality, respecting deadlines and the client's budget, our team is enriched with part-time designers, programmers and freelancers. That makes our agency different and standing out for being able to better cater to the needs of our clients.

Process

Mentioning quality, deadline and budget in the same sentence seems very brave to do. But we in DAA Montenegro have developed a specific way of working that allows us to deliver!

We give clients enough time, so that we would together look at the problem from all sides and discuss possible solutions or directions for finding one. That relieves our clients from anxiety about the final solution and leaves every possible misunderstanding and error resolved at the beginning. That way we stay efficient, there are no deadlines broken and the budget is used in the best possible way.

Our slogan "Get noticed!" is making us approach every project from a different perspective, in order to deliver an original and unique solution.
